### CHINOOK SCHOOL BOARD MEET

A special meeting of the Board of Trustees of Chinook Consolidated School District was held in the school last Thursday evening. All members of the board were present. Also Mr. J. S. Smith, High School Inspector.

It was decided to advertise in Calgary Herald, Edmonton Journal, and Toronto Globe for Principal and an Assistant for Chinook Consolidated School, the two to teach the subjects of grades 8, 9, 10 and 11. The Principal to teach Mathematics and Science, and to receive a salary of \$2,100 per year. The Assistant, a lady preferred, to teach English and History, and to receive a salary of \$1,700 per year.

Further that we advertise in the Calgary Herald and Edmonton Journal for three teachers for grades 1 to 7 inclusive. A primary teacher for grades 1 and 2, an intermediate teacher for grades 3, 4 and 5, and senior public school teacher for grades 6 and 7. All applicants for these positions to state salary expected. Duties for all to commence September 2nd.

That owing to the fact that the Board have considered it advisable to advertise for a full staff of teachers for next term, all the members of the present staff be notified that their agreements shall terminate at the end of the present term, and that they be further advised that their applications if sent in will be considered by the Board along with others that may be received.

### FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture  
Edmonton, Alberta, Saturday, May 31

Heavy showers of rain in many districts in the Province have considerably improved the condition of the new crop, and the outlook is much brighter in consequence than at the date of the last report.

The rains were fairly general in most districts and the precipitation in the past fortnight has varied from a quarter of an inch in some of the more central and northern districts. The south-eastern section of the Province, which had commenced to feel the lack of moisture, reports some very satisfactory showers, though over a wide area. The early sown grain is not suffering, but some of the late-sown grain in the dryer districts has not germinated well.

New wheat is from four to ten inches in height, and seeding of oats and barley is nearing completion. There has been considerable delay in the seeding of oats for green feed, and much of this is yet to be done. Seeding of corn is reported in many districts and in some places this crop is now being sown in preference to sunflowers, not only in the southern districts, but in some of the central districts as well.

Irrigating is general in the south and the alfalfa crop is showing strong growth.

Rather sharp frosts occurred in

### Leave For Saskatchewan

Mr. R. Hamon and family left this week for Parkburg, Sask., where they will make their home in the future. The Hamons have been in Chinook for a number of years and have made many friends who will miss them now that they have left.

### Popular Farmer Leaves District

The community is losing two of its finest type of people in the departure from our midst of Mr. and Mrs. E. E. Noble. During their stay in the district they have identified themselves with every movement for the betterment of the community, and for the enlightenment of social life. Mr. Noble has taken an active part in the different farmer's organizations being President of the U. F. A. Local and the Agricultural Society for some years. He was always in demand as a speaker at the different meetings, and many a time has his fluency and tact bridged over an awkward moment. Mrs. Noble and the children left Tuesday morning for Orroville, Wash., where she will reside for a time, and Mr. Noble will follow her when he gets his business affairs here in order.

### Farewell Party

The boys and girls of the school gave a party last Friday evening for their friends Bessie and Ernest Noble and Lyla Hamon. These young people, who have left the district, were presented with suitable gifts as a token of the estimation in which they were held by their friends. The evening was passed in fun and frolic so delightful to youth.

### Settlers Arriving

Settlers from many countries are arriving in Alberta in considerable numbers each week, most of them being from Britain and Northern Europe, with several parties from the United States.

several districts about the 19th of the month, but very little damage resulted.

Pastureage is rather poor in south eastern localities, but in the central and northern districts is better, and some districts report the outlook for the hay crop is the most promising in years.

Generally speaking, crop conditions may be said to be very satisfactory. In no localities is the growing grain suffering for lack of moisture and this fact is due largely to the splendid soil conditions at the beginning of the season, which may be said to have been the best in some years.

Grasshoppers have become numerous in several localities, both south and north, but the Department is meeting the situation with the organization which proved so effective during the past two seasons. Cut worms are also giving trouble in a few places.

### Alberta's Low T.B. Death Rate

According to figures compiled by a prominent American insurance company, Alberta has a very low death rate from tuberculosis in comparison with other countries. Alberta's rate is given as 58.1 per 100,000, Canada's rate being 111.5 per 100,000 white policy-holders, and the U.S. rate being 90.5 per 100,000 white policy holders.

### Oil Activity

In addition to the activity in the Leithbridge-Coutts oil field this year, there will also be drilling on at least five different locations in the Wainwright field east of Edmonton this summer.

### Newspaper Men Entertained

A party of Canadian daily newspaper men and their wives were entertained at the Alberta Capital during the past week on their way to the annual convention at Vancouver. Some of the visitors had not been West before, and naturally were greatly impressed with what they saw in Alberta. On their return East the party is to be entertained at Calgary.

Seven families just arrived in the Dominion, appear to have established a record in immigration with 11 adults and 54 children, the latter ranging from 23 to 1½ years.

## Britain Shows The Way

Great Britain continues to be the wonder of the world. Those who said her people were decadent, and that the foundations of her financial, moral and physical life were crumbling, have her answer in the Empire's record during and since the Great War. Asking no favors she is paying her debts to the last farthing and her credit is unquestioned. While other nations have quailed beneath the burdens they have had to bear, Britain has shown the world that she is still able to triumph over great obstacles and turn seeming defeat into victory. A British paper sums it up in this way:

"Those in charge of the public purse since the first year of peace have reduced the expenditures of the country from over £2,000,000,000 a year to but little over £800,000,000. The staff in the Government offices have been so greatly reduced that there are now only ten per cent. more officials at work than before the war. And here it must be remembered that the work of the public administration has been enormously increased owing to the pensions and other services introduced during and caused by the war. Though nearly half our income goes to the payment of interest on debt, we have in three years out of income reduced our debt by £450,000,000. Since the Armistice we have nearly halved the floating debt. It was £1,500,000,000. It is now only £800,000,000. We have paid off, in addition, all our foreign debt, except to America. We have balanced our budget and we have established a sinking fund. These things have been hard to do, but we have maintained the credit of the country."

Hansley Macdonald, the Labor Premier, is maintaining this credit. Many problems had to be faced by Britain during last year. Strikes and unemployment had to be dealt with, and millions of pounds were paid out in doles and pensions. Her army and navy had to be provided for, and she had to meet the expenses required for administration of the Empire, which comprises a quarter of the world's territory and a third of its population.

In the face of all this, the surplus of \$240,000,000 has been produced, the floating debt reduced by \$175,000,000, and food taxes considerably lightened.

Britain stands for progress, and while other nations have been engaged in petty strife, she has not been afraid to disarm. Telling for Peace and reconstruction, she is today an Empire of which her people are proud.

What a bright example has been set in the fearlessness of her democracy. The creating of free nations within a nation, welding together and consolidating the people of far-flung countries into one vast united empire on which the sun never sets.

Addressing a gathering at an Empire Day meeting held in London, Colonial Secretary Thomas said there could be no shadow of doubt that there was no nation in the world whose record stood higher for all that was good and noble in life than the record of the British Empire. The students he was addressing had just sung "Land of Hope and Glory," and referring to this fact, the speaker said that his one aim and hope was to help to make our Empire a land of hope and glory—hope for those who have believed we could have world peace; hope for those who have felt that social injustice must be removed; and hope for those who are down-trodden that they may feel that they will be given a chance. In short, we should have hope and belief in the fact that this Empire of ours is not the preserve or monopoly of a class or creed, but something that belongs to us, that must be maintained and defended by us, and made worthy of us all.

## Tourist Traffic To Be Heavy

Heavy Tourist Traffic Is Expected In Alberta This Season

Expectations are for a very heavy tourist traffic to Alberta this season. The railways are preparing for a large influx of tourists to the mountain parks, which will be open shortly and the various auto clubs in Alberta have indications of heavy motor tourist travel. The Mounted Police Pageant and celebration at Macleod, the Stampede at Calgary, and the Stampede and Exhibition at Edmonton, are events which are expected to attract many visitors. The Mounted Police Pageant is on July 1, 2 and 3, and the Calgary Stampede is in the week of July 7, with the Edmonton events the week following.

## Stops Coughs, Colds Sore Throat in a Night

Think of a medicine so healing, so balsamic and so simple that every trace of cold and soreness goes before it. CATARRHOZONE is that every case is relieved promptly. Experiment no longer—success is guaranteed if you use CATARRHOZONE—a veritable death to catarrhal diseases, because it destroys their cause and remedies their effects. Delightful and simple to use, quick to act, sure in results. Better get CATARRHOZONE today. Large size, sufficient for two months' treatment, price \$1.00; small size 50c. All druggists. Refuse a substitute for CATARRHOZONE. By mail from The Catarrhozone Co., Montreal.

## Plan Metal Seaplane

British Craft Will Be Refueled in Mid-Air

The march of progress goes on apace in aircraft construction and research now proceeding apace to evolve winged ships of metal with staunch sea-going hulls which will be able to stay out cruising, fly over oceans, and only require to replenish fuel occasionally from some surface tender.

Secret developments in metal construction will be incorporated in the new planes, which will be larger than those just tested to carry 12 passengers at 100 miles an hour. Refueled in mid-air from airplane tankers by means of flexible tube devices is to be developed on the new air boats.

Miller's Worm Powders are the medicine for children who are suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and at the same time, they are tonic in their effect upon the digestive organs, restoring them to healthy operation and ensuring immunity from further disorders from such a cause.

## Exploits Of D'Oisy Stir French Aviators

Attempts at Record Flights Are Soon To Be Made

The exploits of Captain Pelletier D'Oisy, the French aviator who flew from Paris to Shanghai, have stirred French aviators that various attempts at record flights are soon to be made. Col. Vuillemin is contemplating a flight across Africa to the Cape of Good Hope it is understood. Lieut. De Peyser expects the government to authorize a trip to the North Pole, which he is planning to make. Capt. Duquesne plans to fly from France to Madagascar, while Capt. Gille wants to perform the stunt of leaving Paris in the morning, landing in Algiers, and returning to Paris for dinner, or covering 3,000 kilometres by airplane in one day.

## Stock For Prince's Ranch

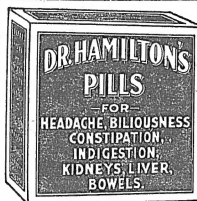

Shipment Includes Seven Hunters and Small Dartmoor Pony

A number of valuable pure-bred sires and mares belonging to the Prince of Wales have been shipped from Liverpool aboard the steamer Gracia, enroute to the Prince's ranch in Canada for breeding purposes. The consignment was purchased by the ranch manager, W. L. Carlyle, when on his recent visit to England, and comprises four Clydesdales, including the three-year-old stallion, Baron Blackwood; seven hunters, including the well known steeplechaser, Irish Prince; and a Dartmoor pony. The pony is so small that it was brought to the steamer in a wooden crate.

## Old Drawbridge Discovered

As the result of excavations at Trent Park, the residence of Sir Philip Sassoon, a drawbridge of great antiquity has been discovered. Roman daggers and sandals and some golden horse-shoes also have been unearthed. According to tradition, Dick Turpin used to hide in the moat in this park.

W. N. U. 1027

## Higher Education Pays

Investigation Shows College Men More Successful On Farms

The old tradition that farming could be carried on just as successfully without higher education as with it appears to have broken down under investigations recently carried out. The Kansas Agricultural College took the initiative and on a question covering 1,237 farms in that state found that the annual earnings of farmers having a common school education was \$122; of those with high school education, \$554; those with a partial college course, \$559; and those with full college course, \$1,452. All succeeding investigations in other states showed practically the same results. When it came to the question of modern conveniences and improvements, the college men were always in the lead by fifty per cent. or more. Perhaps it is the more ambitious men who get the education. May be they would lead in any case. But with data so widely gathered the conclusion seems clear that education is an advantage in every way. Man is designed to be something more than a drudge or "a heaver of wood and a drawer of water." Anything that enhances the value of his manhood is good and a permanent available asset. —From the Amherstburg Echo.

## Cuts and Bruises Disappear—When Suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil.

Its healing power is well-known in every section of the continent. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

## Was Friend Of White Man

Memory Of Indian Chief Peguis Honored By Monument

In commemoration of the good work of Peguis, chief of the Saulteaux Indians, the "white man's friend" and a faithful Christian, a monument was unveiled in Kildonan Park on Victoria Day by Sir James Atkins, Lieutenant-Governor of Manitoba. A notable gathering of Red River Valley pioneers, including many members of the Peguis tribe, attended the ceremony. Chief Henry Prince, grandson of Chief Peguis, was present.

The monument was erected by the Lord Selkirk Association.

## A Severe Attack Of Heart Trouble Was Relieved By MILBURN'S Heart and Nerve Pills

Mr. S. E. Barnes, Athens, Ont., writes: "Four years ago I had a very severe attack of heart trouble. I consulted my doctor; he treated me for some time, but I only seemed to be getting worse. I finally went to our druggist and purchased three boxes of Milburn's Heart and Nerve Pills and derived immediate relief from their use, and I can truthfully say they are a wonderful medicine. I always keep a box on hand, and if I feel out of sorts I take a few pills and feel all right again."

Milburn's Heart and Nerve Pills are 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## Better To Stop

Much better to stop at the crossing and cuss if you want to than have the corner poking into you to see what went wrong.

It will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen the lungs against subsequent attacks. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

## Largest Australian Ranch

The biggest purchase of pastoral property ever recorded in Western Australia has been made by Sir Richard Waldie Griffith, who recently bought two prop-rieties, each consisting of about 500,000 acres. The pastures, for which the price of \$500,000 was paid, have been covered with 700 miles of fencing and 50 paddocks have been built.

Minard's Liniment, the Athlete's Remedy

## Farmers and Monopoly

Price Is Usually the Factor That Governs Production

We may reason that a certain group of farmers cannot produce the wheat, another group corn, another group dairy products, and so on, but it will be found that no power will keep them producing a certain kind of farm product when some other pays better. Price is the greatest force in influencing the kind and quantity of farm product produced.

Wages are relatively higher in the city than they are in the country. This causes a movement of the people from the farm to the city. We may well reason that the people will be better off to remain on the farm, that the disparity between the prices of farm products and other commodities cannot last. Nevertheless it is but natural for people to seek the occupations that will return them the greatest income.

Those who feel that through cooperative effort a farm monopoly will be established, forget that if any farm product becomes relatively higher than some other it stimulates an increased production which would defeat any form of organization attempting to establish a monopoly. Every sensible farmer and every thinking business man knows there is no such thing as a farm monopoly.—Hoard's Dairyman.

## Coming Events

List of Dates For Some of the Forthcoming Summer Fairs

Manitoba Summer Show, Brandon, June 20 to July 5.

Calgary Summer Show and Stampede, July 7 to 12.

If Tormented With Corns Use Good Old "Putnam's"

It is really a simple thing to remove your corns, and without pain. If you apply Putnam's Footwear Extractor. It acts like magic, lifts out the corn, root and branch, leaves the skin smooth as silk. No failure with "Putnam's." See everywhere.

## Thumb Is Index To Mentality

Tendency to Insanity Puts the Thumb Out of Alignment

The thumb is said to be an excellent indicator of character. Those who are in full possession of all their faculties make good use of their thumbs. Wherever there is a tendency to insanity this generally useful and active member falls out of work. A physician in charge of a lunatic asylum states positively that if you see a person whose thumb remains inactive—standing at right angles and taking no part in the act of writing, salutation or manual exercise generally—you may be sure that he has a diseased mind. He may talk intelligently and appear sane in every respect, but undoubtedly a tinge of madness is lurking within his brain.

## Lunch For The Man

It is always a problem to make up a tasty and nourishing lunch. A reader sends us this letter on the subject:

"My husband, as a rule, hates sandwiches, but this one never fails to call forth words of recommendation—one hard boiled egg, one-half the amount of salt meat (ham, corned beef, dried beef, or cooked bacon). Grind the egg and the meat. Season to taste with salt, pepper, mustard, and a few drops of vinegar. Moisten to spread, with Borden St. Charles Milk. Serve on a crisp lettuce leaf (with a little onion, chives, or celery chopped in with it, if you like). Allow one egg for each three sandwiches."

## Cows Live High

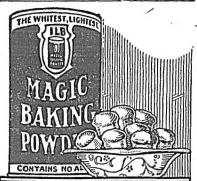

A thin shooleader was killed recently when a cow fell through the roof of his house into the dining room. Animals often are kept on top of the houses in Peru, and it frequently happens that a cow passes her whole life on a roof, being taken there as a calf and finally brought down as fresh beef.

## CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mothers! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it. The kind you have always bought bears signature of

Dr. J. C. Fletcher.

## The Secret of Successful Baking

consists very largely of choosing a baking powder whose leavening qualities are uniformly reliable.

Magic Baking Powder is the powder that never fails you. This is the reason why it is by the far the most popular baking powder in Canada.

# MAGIC BAKING POWDER

## Producing Blood Oranges

Fruit Is Cross Between Ordinary Orange and Pomegranate

It has been recorded of George III. that he once asked: "Tell me, how do the apples get into the apple dumplings?" The answer to that question may be simple enough, but should we all be able to reply with equal readiness if someone inquired of us: "Who put the blood in the blood orange?"

The fruit commonly called blood orange is really a cross between the ordinary orange and a pomegranate. The juice of the latter is dark red in color, and when an orange tree branch is grafted into the pomegranate tree the resulting fruit takes the form of the orange, but shows traces of the juice of the larger fruit.

There is a difference in the flavor, but it requires a very fine palate to detect the sharper taste of the pomegranate. The juice of any orange, blood or ordinary, is an antiseptic, and most beneficial to the system.

## PALE, WAN CHEEKS AND DULL EYES

Is Proof That the Blood Is Thin

It is the blood that gives color to the cheeks and lips, as well as brightness to the eyes. If your blood gets thin the color will fade and your eyes grow dim. By the time this happens you will notice that you tire easily and are subject to headaches and backaches, for the blood goes everywhere and the entire system feels the effects when it becomes thin. Dr. Williams' Pink Pills contain the elements necessary to enrich the blood, and this better blood strengthens the nerves and all the organs of the body, brings a glow of health to the cheeks, brightness to the eyes and a general feeling of renewed health and strength. Miss Florence Johnson, Stratford, Ont., who has proved the value of Dr. Williams' Pink Pills in cases of this kind, says: "A few years ago I was greatly run-down; my blood was very poor and my nervous system in bad shape. The doctor said my condition was due to impure diet and lack of fresh air. I then commenced eating the food he advised and went out daily for a walk. I did not improve, however, and was much discouraged. A friend then advised me to try Dr. Williams' Pink Pills. I lost no time in getting a supply and can truthfully say that when I had finished the first box I could note an improvement. From then on the progress was steady. My complexion, which had been pale and sallow, began to take on a healthy glow. I felt a great deal stronger and my appetite became normal and soon my health was fully restored. Before using Dr. Williams' Pink Pills I did not know anything about their wonderful qualities, but now I recommend them to all suffering from similar ailments."

You can get these pills from any medicine-dealer or by mail for 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The last ten presidents of the United States have died at an average age length of life of 61.9 years. Then ten presidents who preceded them lived to an average of 63.5 years, and the first six reached an average of 79.6 years.

## CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mothers! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it. The kind you have always bought bears signature of

Dr. J. C. Fletcher.

## The "grain of Mustard" for health

Don't refuse the mustard when it is passed to you. Cultivate the habit of taking it with meat, especially fast meat. It stimulates the digestion and aids in assimilating your food.

but it must be Keen's

## Less Pot-washing

SMP Enamelled Ware has the smooth surface and polish of fine crockery—without the breakage. And it is so very easy to clean—just like china, and therefore makes light work of pot washing.

Try this test. Take an SMP Enamelled Ware sauce pan and an all-metal sauce pan of equal size. Into each pour a quart of cold water. Put on the fire at the same time. The SMP sauce pan will be boiling merrily when the water in the other is just beginning to simmer.

## SMP Enamelled WARE

"A Face of Porcelain and a Heart of Steel"

Three finishes: Pearl Ware, two coats of pearly grey enamel inside and out. Diamond Ware, three coats, light blue and white outside, white lining, crystal ware, three coats, pure white inside and out, with Royal Blue edging.

THE SHEET METAL PRODUCTS CO. LIMITED  
MONTREAL TORONTO WINNIPEG  
EDMONTON VANCOUVER CALGARY

W. S. U. 1527

Both the Admiralty and the War Office have to make provision in their estimates for the maintenance of three cats each, which are regarded as being attached to the permanent staff for duty. The senior official cat at the Admiralty is one named Jim, which has rendered 20 years' service.

Individual and tribal property of American Indians is estimated to be worth \$127,746,397.

M. Hitler expressed the fact that if no measures were taken to prevent the importation of wheat into France, prices at the next harvest time would drop sharply, would imperil the French farmers and would cause them to cease planting.

Visitors to the British Museum will presently have the chance of seeing a Chinese portrait of a woman painted upon silk, which, though more than 50 years old, retains its vividness.

Q.—I have heard that hundreds of ten and twelve-year-old children in southern Alberta and Saskatchewan have yet to see their first tree. Can this be true?

The Indian, with a natural aptitude for conferring upon places names which were appropriate to their setting, called it "Mee-Naw-Ke, the beautiful Country." The white man who followed in his footsteps, but who enjoys the comfort of Minkin Inn, the hotel operated by the Canadian National Railways, agrees with the Indian's name and his estimate of beauty. For Minkin, because of its beauty and charm of simplicity, is drawing more and more Canadian and American tourists to itself year by year.

Canada is famed for her beauty spots, but none has sweeter charm for the holiday-seeker than has Minkin, situated on a green-clad promontory jutting out into the Winnipeg River. Natural beauty of woodland, lake and river scenery greets the eye the moment one leaves the Continental Limited, the all-steep train of the Canadian National Railways. Starting from Minkin Inn, and at each turn of the woodland trails, there is a new and more beautiful view of the Canadian beauty of the Winnipeg River, upon whose wavelets the sun plays. Beyond, with distance gradually shading the colors to a bluish grey, the visitor sees a panorama of timber-clad hills, which extend to the very shores of Hudson Bay.

From Minkin presents to the visitor a glorious succession of blues, greys and greens; in the sunset hour it is a veritable dream; at night, part-

ever seen a tree of any kind. These same lectures showed many audiences in Western Canada their first motion pictures and gave them their first radio performance.

Q.—Where can I obtain cheaply a first-rate book on Canadian trees?

A.—The best book on this subject was issued by the Dominion Forestry Branch, "Native Trees of Canada." It can be had for fifty cents from the King's Printer, Ottawa.

Q.—What government is chiefly responsible for forest fire prevention in Canada?

A.—The governments of Ontario, Quebec, New Brunswick and British Columbia maintain well equipped fire services and control absolutely their forest policy. The Dominion Government looks after the forests of the prairie provinces and the "railway belt" in British Columbia. In Nova Scotia the government is a minor forest owner and forest protection is carried on chiefly by a county system of wardens.

**Canadian Cattle For British Guiana**

The first time on record that a shipment of stock from the Dominion has been purchased in British Guiana took place recently when the Canadian Pacific steamer Borden took on a number of prime Shorthorns at Montreal for shipment to British Guiana. This stock, which comes from the Maple Grove Stock Farm at Cookshire, is regarded as very high standard. It is thought that this initial shipment may prove the means of opening up a new and profitable market for good quality Canadian cattle.

**Cows in Southern Alberta**

Nearly 100,000 acres will be planted in cows in Southern Alberta this year, according to official estimates made by the provincial department of agriculture. Last year the acreage in cows in the province was estimated at 53,000. A large area is also being sown to sweet clover.

A petriol bud of a miner was recently found in an old caved-in mine

**"It's good tea"**

**and the choicest of Red Rose Teas is the ORANGE PEKOE QUALITY**

**A Giant Telescope**

Being Manufactured in England for Shipment to Observatory in Russia

One of the world's wonder telescopes, which after seven years to make, and stands higher than six miles is now being tested and assembled the works of Sir Howard-Grubb and Son, where the final details are being added before its shipment in three months' time to the Simels Observatory in Russia.

The telescope is worth £15,000. It contains a mirror 40 inches wide, 6½ inches thick, and weighing nearly 1,000 lbs., which took more than a year of continual grinding and polishing to make. This piece of glass alone cost the Russian Government £1,000.

The principal eyepiece is not at the lower end of the barrel near the ground, but juts out at the growth of the telescope. The observer is hauled up from the door some thirty feet below in a steel chair, and dangling like a spider from a gigantic pencil, follows the stars in their courses. The movements of the instrument are controlled by a clock, set so that the star under observation will be kept in sight as it moves across the heavens. Thus, as the astronomer hangs in mid-air, he is carried in or are inside the dome, which also moves round as the telescope is operated.

Many astronomical telescopes are made for vision alone, but this one is constructed so that photographs may be taken of the stars it mirrors while the astronomer is observing them through the eyepiece on the end.

**Completely Relieved Of Her Kidney Trouble**

**So Says Quebec Lady After Taking Dodd's Kidney Pills**

Madame S. Polnier suffered for a whole year when she took Dodd's Kidney Pills.

Lady Cedres Sta. Quo.—(Special)—No place in Quebec Province seems to be too small to furnish at least one person who is prepared to say that she owes her health to the great Canadian Kidney Remedy. Madame S. Polnier, a well-known resident here is only one such.

"I have suffered for one whole year with my kidneys. After taking Dodd's Kidney Pills my trouble has gone and I am now quite well."

Dodd's Kidney Pills have become a family remedy because people have tried them and found them good. They help Rheumatism, Lumbago, Diabets, Lane Back, Heart Disease and Urinary troubles, because all of these are either Kidney Diseases or are caused by the kidneys failing to do their work.

Obtained from druggists everywhere or The Dodd's Medicine Co., Ltd., Toronto.

**Spillers, Limited, Building Elevator**

Work has commenced on the erection of the Immense elevator which is to be built at Vancouver by Spillers, Limited, the great British company of millers and grain dealers. The capacity of the elevator will, it is stated, be 2,000,000 bushels and its cost, exclusive of jetties, will be approximately \$7,500,000. The construction of this elevator will more than double the capacity of the port as it now stands.

MRS. A. A. FOULGER

This Nurse Sends a Message to Every Woman in Canada

Brantford, Ont.—During twenty-one years of experience at nursing I not only took Dr. Pierce's Favorite Prescription myself to keep up my health and strength, but I have recommended it to many a patient, especially those mothers and think it safe by far the best tonic and nerve-giving woman can take, and for that reason I give it my highest endorsement. Mrs. A. A. Foulger, 41 Sheridan Street.

Health is most important to every woman, and therefore, what is it that when your neighborhood druggist can't tell you how to get it? It is contained in Tablets or Liquid. This Prescription is made in Dr. Pierce's Laboratory in Bridgeport, Conn. Send 10 cents for if you wish a trial package.

Saskatchewan Butter Production

Creamery butter production in Saskatchewan, during the first three months of this year, shows an increase of 409,458 pounds, according to the provincial dairy commissioner. Total production for the period amounted to 1,683,764 pounds, compared with 1,274,306 pounds for the first quarter of 1905.

In another year ending in 1905, Canada had an average of 1,461 carloads a year, most of them light.

The real Robinson Crusoe's name was Alexander Selkirk.

## BRITISH GOVT. HAS MAJORITY ON A DIVISION

London.—By what may, under the circumstances, be regarded as a quite comfortable majority, 48, the Labor Government again succeeded in resisting an attack on its existence, when Sir William Joynt-Jones' motion to reduce the salary of the labor minister, Tom Shaw, by £100, was rejected after a long debate.

The motion was merely a technical way of expressing disapproval of the government's policy respecting unemployment and a similar motion was talked out in the House recently. Prior to the recording of the vote, Premier MacDonald declared that in the event of a government defeat, Labor would go before the country in a general election.

On division, the vote stood 300 to 252 in the government's favor, 11. 11. Asquith, the Liberal leader, having announced that his party would not vote against the government.

There were lively scenes of jubilation and counter-demonstration when the vote became known, and shouts of "where is Lloyd George?"

Mr. Lloyd George attended the Liberal meeting to decide upon what action should be taken on the vote, but had not returned to the House when Mr. Asquith announced the decision of his party, and his absence provoked gossip of a split among the Liberals.

The figures of the division showed that 100 Liberals voted with the government, and 20 abstained from voting.

No doubt exists among well-informed political observers that the Conservative wing of the Parliamentary opposition is quite ready to vote the government out of office at any moment.

This, however, is not the state of affairs in the Liberal wing, because in the recent by-elections the Liberal candidates fared so badly that the party does not care to risk an appeal to the country at the present moment. This situation explains the proceeding in the House.

Prime Minister MacDonald, in defending his Labor Government, did not trouble to outline any real programme of reforms in any greater detail than he has already done in previous speeches.

## No Financial Aid From Ottawa

Proposed Inland Trip For British Tars May Be Cancelled

Vancouver.—Plans of the civic committee for the reception to the special service squadron of the British fleet here next month were given some what of a jolt when wires were received from Ottawa that the Dominion Government would accept no responsibility for plans of entertaining the fleet other than the two smoking concerts which it had previously agreed to give the men at Vancouver. It had been the understanding by the committee that the federal authorities would give 250 men and 40 officers a trip to the interior as far east as Winnipeg. All points between Vancouver and Winnipeg were greatly interested in this proposal and were preparing welcomes, but the wire from Ottawa stated that the government recognized no responsibility in this connection.

The provincial government has made a grant of \$2,500 toward the reception and the Vancouver city council has voted \$6,000.

For Prohibition Enforcement Washington.—A brand new Congressional investigation, directed at prohibition enforcement, was determined upon by the House alcoholic liquor traffic committee. The committee designates a sub-committee, with instructions to go into all phases of the liquor law situation, including rum smuggling and charges of abuse of the present system.

British Immigrants in Majority Ottawa.—During the month of April, 19,350 immigrants entered Canada as compared with 5,500 in April, 1925, according to figures issued by the department of immigration. Of those admitted last month, 9,110 were British, 1,528 were from the United States, and 8,682 from other countries.

## ASTHMA

Spread liniment on brown paper and apply to throat, also inhale.

W. N. U. 1527

## Offers Large Grant For Mental Hygiene Research

Toronto.—The Canadian National Committee for Mental Hygiene has received a grant of \$75,000 from the Rockefeller Foundation, for research, experimentation and demonstration in mental hygiene, says an announcement by the committee, on condition that an equal amount should be provided from Canadian sources for similar purposes. The Rockefeller Foundation also stipulates that studies be conducted for a period of five years in applying mental hygiene principles to school children.

## Brilliant State Ball

Buckingham Palace Is Scene Of Splendor In Honor Of Italian Royalty

London.—The state ball given by King George and Queen Mary at Buckingham Palace in honor of the visit of King Victor Emmanuel and Queen Helena, of Italy, was on even a greater scale of lavish splendor than the recent ball tendered their own subjects. The function was the culminating social event in connection with the visit of the Italian sovereigns.

Large crowds of Italians gathered in the precincts of the palace, where they were entertained with selections of music played by the band of the Coldstream Guards.

King George and Queen Mary and King Victor Emmanuel and Queen Helena, after the procession to the ball room, during which the national anthems of Great Britain and Italy were played, led off in the quadrille, and all the members of the royal party participated in the ordinary programme of the ball which followed.

The state apartments were beautifully decorated with flowers and shrubs. A guard of honor of the Coldstream Guards were mounted at the entrance of the palace. The ball room presented a dazzling display of jewels, the royal visitors having brought with them the priceless crown jewels of the House of Savoy and also specially made ball dresses, the work of Italian designers.

The guests included large numbers of members of foreign embassies, especially the Italian embassy, representatives of the British Government, headed by Premier MacDonald, who had with him his daughter, Isabel, and the leaders of all ranks of society.

## Metric Weight System Adopted By Japan

Actual Usage Will Be Introduced During July

Tokyo.—Japan is preparing to adopt the metric system of weights and measures, and educational propaganda designed to acquaint the people with the system is being spread under the direction of the department of agriculture and commerce.

Actual adoption of the system will begin July 7. Within five years from that date all government departments, factories, services and schools must substitute the metric system for the present Japanese units of weight and measure.

## May Improve British Ports

London.—Schemes for improving the port facilities of the United Kingdom at an estimated expenditure of £20,000,000 have been recommended by a committee appointed by the Shipping Association, British Chamber of Commerce, and the Federation of British Industries, after a searching inquiry into the matter of the British ports.

India Cannot Have Home Rule London.—The British Government is unprepared to make any proposals at present toward the extension of home rule to India, it was announced by R. H. Clynnes, deputy leader in the House of Commons, in answering a question in the House.

## Six Killed By Bomb

Kuruman, Bechuanaland.—While a review of military commands was in progress here, a bomb fell accidentally from a military demonstration airplane into a crowd of spectators. Six persons were killed outright and 19 injured.

## Fire At Sutherland

Saskatoon.—Fire of unknown origin completely destroyed the store of R. Leitch at Sutherland, Sask. The building was valued at \$4,000, and the stock at \$7,000.

## La Follette Possible Candidate

Washington.—Senator Robert M. La Follette announces himself ready to run for the United States presidency on an independent ticket.

## Sleeping Sickness In Britain

London.—In the last quarter ending March 31, there have been 229 deaths in England from sleeping sickness.

## WESTERN EDITORS

G. C. Duncan, Editor and Proprietor of The Mail, Drumheller, Alberta.

## C. N. R. DEFICIT IS REDUCED BY SUBSTANTIAL SUM

Ottawa.—It was in terms of optimism that Hon. G. P. Graham, minister of railways, presented to the House, the annual statement of the Canadian National Railways and the Canadian Government Merchant Marine. He gave comparative results for last year and the year previous.

On all Canadian National Railway lines (including the Central Vermont) he gave the net operating revenue as:

1922, \$21,187,462; 1921, \$23,993,237; increase, \$17,194,225.

After usual deductions and additions involved in taxes, rentals, hire of equipment, etc., total income before fixed charges was:

1922, \$13,364,875; 1921, \$14,499,782; increase, \$11,865,093.

Fixed charges during the year increased from \$60,196,693 to \$66,144,226. The total deficit, after fixed charges, was:

1922, \$52,779,350; 1921, \$58,696,912; decrease, \$5,917,561.

The Canadian Government Merchant Marine had a deficit last year, after all charges, including depreciation and interest, of \$9,363,670. This is an improvement of \$256,808 over the previous year.

Mr. Graham drew attention to the point that as a result of the year's operations, the railways themselves had been able to provide \$12,364,875 (an improvement in round figures over the previous year of twelve millions) towards fixed charges due to the public.

Sir Henry Thornton, Mr. Graham said, had made it clear that restriction of maintenance had played no part in the improvement last year. Mr. Graham suggested for the consideration of the House:

(1) Increase of the board of directors, to have a strong executive of business men close at hand who could be called together by telephone overnight.

(2) Whether the government should be asked to guarantee equipment securities.

## Increase In Exports

During 1923 Canada's Best Customer Was United States

Ottawa.—Canada's best customer during the 12 months ended April was the United States, it having imported Canadian goods to the value of \$429,265,000, an increase over the previous year of \$50,000,000. Canadian purchases from the United States were \$596,532,000, an increase of \$41,000,000. Canada's next best customer was the United Kingdom. Imports from the United Kingdom were \$152,017,000, an increase of \$7,000,000; exports to the United Kingdom were \$256,950,000, a decrease of \$28,000,000.

Weekly Newspaper Men Go Overseas Montreal.—Members of the Canadian Weekly Newspapers Association who will undertake the two months trip to Belgium, France and the United Kingdom after the annual convention which will terminate in Toronto, July 7, now number 178. Members have signified their intention of joining the party from as far west as Duncan, B.C., and as far east as Lunenburg, N.S.

## Second Tornado In South

Atlanta, Ga.—The total known death toll of the series of tornadoes which swept the south for the second time in a month had mounted to 45 today. Approximately 100 persons are known to have been injured, scores made homeless and property damaged to the extent of more than a million dollars.

## Sale Of Shares Act Is To Be Tested

Winnipeg.—Validity of the Sale of Shares Act in Manitoba, Saskatchewan and Alberta will be tested by court action in all three provinces. The action will be brought by the Shareholders' Protective Association of the Northwestern Trust Company, in liquidation. This was the course decided upon when the return of the application to settle the list of contributors of the company came up before Judge Paterson, K.C., master of the Court of King's Bench. An adjournment of two weeks was granted.

## Says U.S. Offers To Purchase Death Ray

Mathews Claims American Government Is Interested In Invention Paris.—Americans have entered the race to obtain the secret of Grindell Mathews' death ray, Mathews claims.

With Great Britain, the inventor's own country, and France in competition for the diabolical invention which, it is claimed, may revolutionize war and make the nation which holds it supreme, Mathews gave out that he had received a written offer from the United States.

Other reports said the National Academy of Sciences at Washington had written the inventor asking particularly, and that American naval attaches here had been ordered to investigate Mathews' claims.

American officials here denied that the United States Government was in any way interested in the ray.

Meanwhile, both French and British claim to have a definite contract with the inventor entitling them to share in the deadly ray, which kills at great distances, explodes ammunition, destroys machinery and brings down airplanes in flames, according to Mathews.

## Long Term Credits For Farmers

Dr. Torg, of Alberta, Urges Necessity For Giving Aid To Agriculture

Ottawa.—The necessity for long term credits at uniform rates, under federal control, to permit Canadian farmers to finance their operations, was suggested by Dr. H. M. Torg, president of the University of Alberta, and advisory chairman of the Honorary Council for Scientific and Industrial Research, who was examined by the banking and commerce committee of the House of Commons.

Dr. Torg followed closely the lines laid down in his report on rural credits published by the Federal Government in April last.

He said that in the United States and Canada most of the advocates of the long term credits system were of the opinion that only diversified farming would provide an adequate measure of security for such loans. In the western states credit generally were only available to mixed farmers.

## London Still Financial Centre

London.—Sir John Aldred, president Canadian Bank of Commerce, in an interview in the Financial Times, expressed the opinion that New York would never supplant London as the monetary and financial centre of the world. With the increasing stabilization of exchange, Sir John said, Canada would again turn to London for loan flotations.

## Stefansson In Australia

Sydney, N.S.W.—Vilhjalmur Stefansson, the Arctic explorer, who proposes to explore the wild region of Australia with the idea of ascertaining the possibility of cultivating them, arrived here May 27. He was welcomed by delegates of the Royal Society.

## Heads Musical Association

Moose Jaw.—Election of Col. F. J. James, Regina, as president of the Saskatchewan Musical Association and decision to hold next year's "Southern Festival" in Regina, were the outstanding features of the annual meeting of the association held here.

## U. S. Presidential Aspirant

WILLIAM G. MCADOO

secretary of the United States treasury under President Wilson and now himself an aspirant for the Democratic presidential nomination.

## Radio Messages Sent Printed For Delivery

Letters As They Appeared On Telegram Form Were Perfect

Montreal.—For the first time in the history of wireless telegraphy at sea, radio messages have been automatically transmitted, and actually printed for delivery to the addressees without human aid. Word to this effect has been received by the local office of the White Star Dominion Line from the pursuer of the Olympic in mid-ocean enroute to Cherbourg. The message states that 90 words a minute transmitting apparatus on the ship automatically sent messages over a distance of 500 miles to the land station at Devizes, England, whence they were relayed to the General Post Office, London.

The message further states that the printed letters as they appeared on the telegram form ready to be delivered to the addressees were perfect.

## GENERAL INQUIRY INTO GERMANY'S ARMY EQUIPMENT

Paris.—The Allied Council of Ambassadors has agreed on the terms of the reply it will make to the note from Germany relative to the resumption of inter-allied control of German armaments, it was announced here.

The note adheres closely to the original decision of the ambassadors that the transformation of the military control commission into a committee on guarantees, placed at the expense of the allies, must be preceded by a general inquiry into the state of Germany's military establishment, with a complete inventory of its resources.

The note will demand that the future activities of the control authorities shall cover the five categories listed in the preceding correspondence on this subject. These are:

First—The re-organization of the German police.

Second—The transformation of munitions factories to pursuits of peace.

Third—The delivery of the balance of unauthorized war material in Germany's possession.

Fourth—Delivery of documents relating to the war material on hand when the armistice was signed.

Fifth—The promulgation of laws to put the recruiting organization of the army in harmony with the terms of the peace treaty.

## Trainmen Wage Negotiations

Montreal.—The putting into effect in Canada of the same wage concessions recently put into effect on principal lines in the United States for engineers, firemen, conductors and trainmen, is the sum total of the request made by the executives of the Order of Railway Conductors and the Brotherhood of Railway Trainmen, at the wage conference with the operating committee of the Railway Association of Canada.

## CROP CONDITIONS IN THE WEST ARE FAVORABLE

Winnipeg.—Marked improvement in weather conditions throughout the prairie provinces has proved a welcome boon to the farmers generally. Despite the lateness of seeding operations and the unusually cold weather during the past month, recent rains and rise in temperature have contributed to rapid growth.

Wheat seeding is completed in the three provinces, with the exception of a few isolated districts, while good progress is reported in the seeding of coarse grains.

Farmers in the Regina district report that crops are slightly ahead of last year, and in some districts wheat has reached the height of three inches.

The season's crop prospects in Alberta are regarded as the most ideal in many years. Showers have been general and germination is assured.

In Manitoba the crop is not much later than in former years, although the lateness of the seeding season materially reduced the acreage sown to wheat. There is ample time yet for the development of a good crop, and notwithstanding unfavorable weather conditions during the early spring, "no fear need be entertained concerning the crop," declared Premier Bracken, minister of agriculture for Manitoba, following a visit through the Neepawa district.

## U.S. Has Stiff Problem

Claim Immigrants Are Smuggled Across Border From Canada

Montreal.—Immigrants smuggled by automobile across the Quebec border into the United States are billing Northern New York, Vermont, New Hampshire and Maine jails; organized bootlegging in aliens has been uncovered; stiff penitentiary terms are being handed out by United States courts to those caught; and the United States immigration service is strengthening its frontier patrol.

Such is the situation today as outlined by J. R. Clark, United States customs commissioner in this district, who terms the problem facing his organization as "gigantic."

Mr. Clark pointed out that wartime passport regulations are still in force in the United States, and that judges have the power to impose sentences in the penitentiary and a fine of \$10,000.

## Restore Rheims Cathedral

John D. Rockefeller, Jr., Offers One Million Dollars For This Purpose

Paris.—John D. Rockefeller, Jr., has placed \$1,000,000 at the disposal of a Franco-American committee for the purpose of reconstructing the roof of the Rheims Cathedral, destroyed by the Germans in the World War, and restoring and beautifying the fountains and the gardens at Versailles and Fontainebleau.

Mr. Rockefeller is moved to make this gift because, as he said in a letter to Premier Poincaré, dated May 3, "among the treasures of which France is custodian, are some which belong to the patrimony of all nations, for their influence is a source of inspiration of universal art."

## Gets By The Senate

Ottawa.—One Canadian National Railway branch line bill passed the Senate committee on railways, that to provide for a line running 19 miles from Peebles in the province of Saskatchewan.

## Disaster In Bucharest

Bucharest, Rumania.—The arsenal and ammunition dumps on the outskirts of the city were destroyed by a terrific series of explosions and fire. Enormous damage was done, and great loss of life is reported.

## Wins Story Competition

Toronto.—John T. Babcock, Victoria, B.C., was the winner of the \$200 I.O.E. prize for the best story in the Order's annual competition.

## An Empire In Miniature

Each Building At Wembley Shows Characteristics Of Dominion Represented

The British Empire in 220 acres at Wembley—this is the exhibition recently opened by King George. There is probably not a Canadian miniature in the entire world not represented there; agriculture, mineral wealth, products of the forest, our system of free education, our railway facilities. All housed in an imposing pavilion of neo-Grecian style, it will faithfully show to the Empire and to the world what Canada has done and can do.

South Africa, housed in a pavilion of old Dutch style, covers an area of 6,000 square feet. It is surrounded by typical plants, geranium, monarda, gladioli and Cape heath. An ostrich paddock is at one side. The exhibits are wool, ostrich feathers, mahar, fruit, wines, dried fruits, canned fruits, minerals. Diamond cutting is also shown.

West Africa takes the form of a walled town, and the interior is given over to Nigeria, the Gold Coast and Sierra Leone. Native workers carry on their crafts weavers, leather workers, brass workers.

The West Indian and Atlantic group—Falkland Islands, British Honduras, as well as the Barbados, Jamaica, Bahamas, Trinidad and Tobago, the Windward and Leeward Islands—all housed in a pavilion of the colonial Georgian style. British Guiana is erecting a model of the famous Kaituma waterfall, the highest single drop in the world.

East Africa is housed in a building the exact copy of an Arab building—it is tented and shaded by the Sudan, Kenya, Uganda, Tanganyika, Zanzibar, Nyasaland, Mauritius and Seychelles, Bermuda, the link between the old world and the new tells of its wonderful climate.

Burma has built on its own architecture—the entrance gates are copied from the famous Arakan pagoda at Mandalay. It shows oil, rice, timber, nuts, cotton, rubbers, jade, amber, silk, lacquer work, silver work and ivory.

The Ceylon pavilion, close by, is a land of rubber and its products. Hong Kong section has 150 Chinese shops working at native trades. The Malay sections will be more rubber, for Malaya furnishes half the world's supply of rubber. Palestine and Cyprus and Malta play their business and their arts.

Australia is housed in an imposing structure covering six acres. New Zealand and Newfoundland, practically every corner of the Empire, and that means every corner of the world, have brought their trade, their products, the evidences of their skill.

The great exhibition typifies the greatness of the British Empire. To those who will have the privilege of attending this mammoth enterprise will come a thrill of appreciation and realization of what a hegemony of nations the British Commonwealth is. The world has never had an Empire, so vast, so rich, and yet so disinterested, and so unassuming in its various parts. The crown in all this is the shining emblem, civil and religious freedom has been the incentive, and Anglo-Saxon stock largely the foundation.—St. Thomas Times-Journal.

## Tide Has Rotary Motion

Science Proves It Does Not Go Straight Out and Back

The age-old question what becomes of the tide in the open sea has been answered by observation of the ocean currents from the Nantuxet Shoals light vessel, which is anchored in twenty nine fathoms of water forty miles from land, and which, riding to a long cable, is free to swing with current and wind. Twice in a lunar day of twenty-four hours and fifty minutes the tidal current swings the vessel in a complete ellipse. The current seems to change its direction continually, so that in a period of twelve and a half hours it sets toward every point of the compass. Evidently the tide does not go straight out and back but has a rotary motion. The vertical rise and fall of the tide in the open sea is slight.

**Beautifying Prairie**

The tree planting division of the Dominion Forestry Branch, from its nurseries at Indian Head and Sutherland, has just completed the twenty-second annual distribution of seedlings and cuttings of trees for shelter belt and windbreak planting in the three prairie provinces. The demand by applicants for trees has increased yearly to the present annual output of 5,191,925 trees to more than 1,500 farmers.

**The Reason**

Sister Zibber: Why did you allow Mr. Swatters to kiss you in the sitting room last night?

Daughter:—Because it was so cold in the entrance hall, mamma.

## The Wisest Animal

Indian Elephant Is Original Thinker and Has Good Memory

Of all the dangerous animals ever captured when fully grown, the Indian elephant is one of the wisest. It is the only one which promptly learns that man's mind is superior to brute force and that it pays to be good. A lion, tiger, bear, elk or monkey captured when an adult will try to fight its way to freedom. It never knows when it is beaten and continues to attempt to break its bonds until usually it dies of broken bones or a broken heart.

The Indian elephant is not only one of the best original thinkers, but has also the best memory. A particularly clever chimpanzee can remember as many different things as an elephant, but out of the whole number of captive chimpanzees, there may be only one of this sort, while every Indian elephant captured is capable of learning.

The mentality of elephants is best shown in the circus ring. The whole performance of these trick animals depends upon the ear, eye and memory. It is only an exceptional lion horse or dog that reaches the exhibition platform, but every elephant has the making of a star. Twenty elephants may go through a military drill and perform the series of antics such as "fall in," "roll call" and several kinds of marching with never an error in the bunch. It is possible for Indian elephants to go through as many as thirty-three acts in the circus ring, each of which he must remember and do perfectly.

In the timber camps of Southern India every elephant is trained to do at least sixteen things in the routine of work which he must perform by command. In their work they sometimes show more intelligence than human beings.

## Natural Resources Bulletin

Wild Life Being Crowded North With Advance of Settlement

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, says:

Game conservation is practically the last stand for the larger game animals that once roamed the plains of the American continent. With the advance of settlement, however, wild life is gradually being crowded northward, and the area of its ranges more limited. While the numbers of the wild animals have largely decreased there are still many in the forests and mountains.

Only by the most strict enforcement of game laws can these animals be retained, and it is well to note that the limits of depletion to which any species may be brought before extinction is imminent is well known.

In the Red Deer Valley large amounts are being spent in excavation work to discover the fossilized skeletons of extinct animals. Let us pay more attention to those we have in Canada, and pass on to future generations living species of the wild life of Canada as we know it and as our ancestors knew it. No natural resource needs the application of greater foresight for its perpetuation than our wild life, for it cannot be replaced once it is destroyed, and its destruction can only be avoided by wise provision.

## Religion Of Canada's Leaders

Records of House of Commons, Senate and Cabinet Are Interesting

It is interesting to note that in the House of Commons of Canada there are 72 Roman Catholics, 66 Presbyterians, 26 Methodists, 28 Anglicans, 6 Baptists, 4 Congregationalists, 8 of other denominations and 8 who have modestly declined to make it known to what church they belong. Both Premier King and Mr. Meighen are Presbyterians, while Mr. Forke, the Progressive leader, is a member of a Union Church in Brandon. The Cabinet roll shows: 5 Presbyterians, 5 Roman Catholics, 3 Methodists, 2 Baptists, 1 Anglican and the Hon. Ned Macdonald, who modestly hides his religious predilections under a bushel. The records also show that the Senate numbers 25 Roman Catholics, 19 Anglicans, 12 Presbyterians, 11 Methodists, 3 Baptists, 1 Congregationalist and twelve whose affiliations are not given.

**Artist Has Enough Practice**

With a total of 10,000 paintings to his credit, and all of them sold, George Kay, lightning landscape artist of Kansas City, says his practice period is over. Now he is ready to paint some real pictures. George Kay does most of his work in a local department store.

Three sons—two in the head, a second in the stomach, and the third in the big toe—are believed in by some native tribes in South Africa.

When a fellow is in love with a girl he should leave no stone unturned to win her, not even a syllable.

## Raw Meat For Tuberculosis

Prehistoric Diet Is Recommended By French Scientist

His new method of treating tuberculosis by feeding the patients pure dried juice from raw meat was described to the Academy of Sciences in Paris by Prof. Charles Richet, famous physiologist and winner of the Nobel prize for medicine in 1913.

Prof. Richet applied his method in hospital work during the war with most encouraging results. One hundred patients treated by the professor steadily increased in weight for two months, their gain being attributed to reconstruction of muscular tissue wasted by tuberculosis.

Prof. Richet has long advocated a "cave-man diet" as the only one according strictly to the dictates of physiology. His experiments with dogs have shown that these fed exclusively with raw meat flourished, while others, fed cooked meat, decline and die within a relatively short time.

As it is impossible for tubercular patients to take raw meat in sufficient quantities it must be replaced with the juice which he says possesses the same therapeutic qualities and can be taken in large doses without inconvenience. He administers about 100 grams daily to a patient. The treatment, he claims is equally good for anemic children and in cases of convalescence.

## Growth of Farming

The number of occupied farms in Canada has increased from 511,073 in 1911 to 711,000 in 1921, according to an agricultural census bulletin recently issued. The average of occupied farms has increased from 63,422.273 in 1901 to 108,968.715 in 1911 to 119,887,902 acres in 1921. In 1921 there were 63,602 more farms of 200 acres than in 1911, or an increase of 47.30 per cent.

## That Will Be Next

The Flat Agent:—"Of course, you have no children?"

The Prospective Tenant—"No."

F. A.—"Dogs or cats?"

F. T.—"No."

F. A.—"Piano or gramophone?"

F. T.—"No, but I'll tell you what. I've got a fountain pen that squeaks rather every time I use it. Hope you won't object to that."

There are 14 monuments to the poet Burns in Scotland.

## Increase In Dairying

Saskatchewan Giving Greater Attention to Winter Dairying

Reports of the creamery output of the province for the month of April received at the dairy branch of the Saskatchewan department of agriculture show a total of 67,067 pounds of butter manufactured. This is an increase of approximately 25 per cent over the same month last year when the output for the province was 53,230 pounds.

A comparison of figures for the first four months over a three year period gives ample evidence that the people of Saskatchewan are giving greater attention to winter dairying. States P. E. Read, provincial dairy commissioner, "During the first four months of 1921 the creameries of the province manufactured 2,580,821 pounds of butter as compared to 1,822,556 during the first four months of 1922. This is an increase of 29.9 per cent for the first quarter of the year. Comparing 1921 to 1922, however, we find a vastly larger proportionate increase, the output for the first four months of 1922 being 1,076,546 pounds. It will be noted then that the 1921 increase over these figures is 1,304,285 pounds, or an actual increase of 121.1 per cent over a three year period.

## King's Treasurer Is Unable to Pay Taxes

Has Asked Extension of Time Until Next June

Sir Frederick Ponsonby, treasurer of the King and keeper of the privy purse, has written in reply to a tax summons that his expenses and taxes are so great that he cannot meet the demand for several months.

The King's treasurer resides in Surrey and was summoned for water rate taxes amounting to \$75 and poor rates amounting to \$229. No one appeared at the court for Sir Frederick and the case was adjourned.

The assistant overtook told the court that he had written to Sir Frederick at St. James Palace five times and had had only one reply, in which an extension of time until next June was asked.

A reduction of more than five per cent, is to be made in the pay of British officers.

## Animal Is Repaid For Long Service

Mine Mule Had Private Pasture and Special Attendant

Although most mine mules live a very hard life toiling underground in the most dark drifts of the mine, "Spillertown Sam," the veteran mule of the Peabody Coal Company who died some time ago at the ripe old age of 22, was probably one of the most pampered mules in the United States.

Sam was in the coal mining business for 25 years and during the entire period was never seriously crippled or incapacitated, a remarkable record for a mine mule. In his declining years he enjoyed a life of ease in his private pasture near Marion, Ohio, cared for by a special attendant and housed in his own private barn.

F. S. Peabody, chairman of the board of directors of the Peabody Coal Company, provided Sam with a top-sure lot, well wooded to shelter him in the summer heat, had a comfortable barn built, and hired an attendant to look after him.

While in active service Sam averaged 20 miles a day, underground, hauling coal, year in and year out. He showed special intelligence in regard to performing his work and whenever a strange man was assigned to drive him, he would distrust himself and the driver to the proper working places.

Sam was very jealous of his pasture lot. If another mule was turned in to share it with him, he would grasp the halter of the intruder and lead him around the lot until he became nearly exhausted, then would start to kick him out.

## Build New Elevator

Contract has been let by the Robin Hood Mills at Moose Jaw for the building of a large new elevator, at an approximate cost of \$150,000, the work to begin immediately. This is to be located close to the present building and will increase the storage capacity of the mill to 900,000 bushels.

## The Profitable Cow

A thoroughbred cow down in New Jersey gives 13 tons of milk and five-eighths of a ton of butter. Not only that; the farmer still has the cow for such odds and ends as beef, glue, leather and oxalid soap.—Ottawa Journal.

England's smallest borough is Montgomery, with 951 inhabitants.

## Boost Grain Production

Indians Reap Large Crops and Make Progress in Stock Raising

That the Indians of the three prairie provinces, who up till a few years ago were nomadic hunters, produced in 1922 the astonishing total of 1,577,029 bushels of grains of all kinds, is information most gratifying to all interested in the welfare of these wards of the government. The significance of this great crop which is a half million bushels larger than the crop of 1922, will be made more apparent by an illustration.

This crop of grain, if placed in box cars of the average capacity, would fill 816 cars, which at 51 cars to the train would make 16 trainloads of grain. These trains with their locomotives and cabooses placed end to end would reach a distance of six and one-half miles.

There were 21,665 Indians in the prairie provinces, or to round numbers 6,200 families, this means a crop of over 205 bushels per family, and this in spite of the fact that, of course, with many engaged in hunting and fishing, all the Indians did not participate in growing this crop.

The kinds of quantities of grain grown were as follows:

| Grain       | Bushels |
|-------------|---------|
| Wheat       | 625,212 |
| Oats        | 572,995 |
| Rye         | 62,204  |
| Barley      | 2,157   |
| Indian Corn | 459     |

In addition to this the Indians raised 58,809 bushels of potatoes, 9,223 bushels of turnips and carrots, 57,697 tons of hay and 9,590 tons of green feed. They broke 6,590 acres of new land, summer-fallowed 29,519 acres, and cultivated 273 acres as gardens.

Good progress was also made in stock raising, the number of cattle on the reserves having increased by about two thousand head during the year. In this article, however, attention is confined to the food crops.

In comparison with the crops of white farmers those of the Indians were not uniform. Generally speaking, the smallest crops were harvested on the Manitoba reserves, returns were better in Saskatchewan, and bumper harvests were reaped in Alberta. On the reserves in the last-named province 117,557 bushels of wheat were harvested from 12,145 acres, being at the rate of 515 bushels per acre, a high average for any farming community. Agents report that the work of preparing the soil is being better done each year and that on some of the reserves it compares with that of the best white farmers.

The big crop of 1922 was of course primarily due to the bountiful harvest, but it was also due to the increased area sown and to the good cultivation given the land. The progress made in regard to the two latter factors has been owing to the methods adopted for the teaching of farming. Farming is of course the chief industry taught to the boys of the residential schools maintained by the department of Indian Affairs, but in addition to that the teaching is brought in a most practical manner right to each Indian farm. On each reserve there is a farm instructor who, instead of carrying on a small farm for the Indians to admire, is constantly on the move in a buggy or light motor car visiting all parts of the reserve advising, encouraging, exhorting and reproving the Indian farmers. Thus, while there is no one "show" farm, all the farms on the reserve are raised to a higher level than they would be otherwise.

Tom, Charles Stewart, Superintendent General of Indian Affairs, whose knowledge of farming operations in Western Canada enables him to approach this subject from a practical standpoint, has given this matter personal attention and he is naturally pleased with the results. The Indian farmers of the prairies have still much to learn and much progress to make, but the fact that in about forty years these wandering hunters have become settled and have progressed so far in farming as to reap a harvest of over two hundred thousand bushels of grain, shows that the efforts of the people and government of Canada on their behalf have borne good fruit.

## The Suspicious Boss

"You give your clerks two weeks' vacation every year, don't you, Mr. Tibbatt?" asked the friend.

"A month," grunted the eminent hardware dealer.

"A month?"

"Yes. The two weeks when I go on my vacation and two weeks when they go on theirs."—Good Hardware.

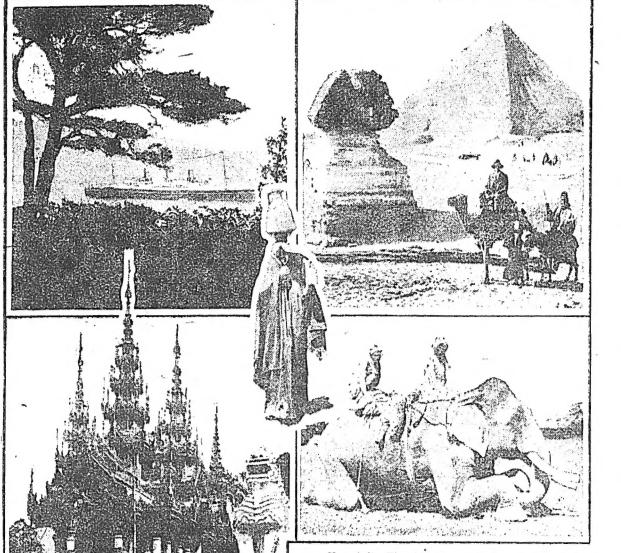

**No Arrest**

He bumped into her car. "I had my hand out," declared the girl indignantly.

"Such a tiny hand," murmured the young man. "No wonder I didn't see it."

"Then the traffic cop waved them all along."

## PURCHASED ELEPHANT AS CURIO

Top left, The "Empress of Canada" at Monaco. Right, Tourists at Cairo. Bottom left, The main entrance to Shive Dagon Pagoda, Rangoon, showing the marvelously beautiful carved pinnacles. Right, The Indian elephant show at Luxor, Egypt. Centre, A water carrier at Luxor, Egypt.

Naples, Port Said, India, Ceylon, Rangoon, Singapore, Java, to the Philippines, China, Japan and the Hawaiian Islands to Vancouver. Sightseeing parties and excursions were arranged at all ports call, and from Bombay, an "Across India" party journeyed overland to Calcutta where they again joined the vessel. At Darjeeling this party was fortunate in meeting the Mount Everest expedition before it set out on the latest attempt to conquer this hitherto invulnerable peak, and the whole trip, according to those who understood it, was one succession of pleasant incidents. Those whose inclinations carried them overland saw perhaps more of the real native life, but those who followed the sea line to Ceylon and from thence to Calcutta, can claim to have visited at least one more country than the others.

Touching the curios which now form a great part of the "Empress" cargo, a copy of the "Rangoon Gazette" just to hand, states that one of the passengers, a Chicago gentleman, purchased an elephant. If this purchase is not the most valuable it must surely be the largest individual one.

### Insulin Value Shown

Statistics Show That Diabetes Has Declined 23 Per Cent.

Evidence that the use of insulin, the new discovery for curing diabetes, is serving to halt the mortality rate from the disease, are contained in statistics just made public by the Metropolitan Life Insurance Company. With the record of its 15,000,000 industrial policyholders for the first quarter of 1924 at hand, the statistical bulletin of the company announces that "mortality from diabetes declined 23 per cent, as compared with the first quarter of last year among the white policy holders, and 17 per cent. among the colored. Each additional month helps to confirm the impression that the growing use of insulin is an important factor in bringing this about."

The death rate from diabetes for March, 1924, was 165 per 100,000, as compared with 223 for March, 1923, according to the company's figures.

Feebly, pale, restless and sickly children owe their condition to your Mother Graves' Worm Exterminator will relieve them and restore health.

### For War Services

Ralph Connor Paid \$17,540 As Captain and Chaplain in C.E.F.

Rev. Dr. C. W. Gordon, "Ralph Connor," of Winnipeg, was paid \$14,578 for his services as captain and chaplain in the Canadian Expeditionary forces. The amount paid to his "de-pendent" was \$2,962 during this period, making a total payment of \$17,540. Dr. Gordon served for four years, three months and twenty-eight days. A part of the time he was engaged in delivering addresses at patriotic meetings throughout Canada and the United States. The information in regard to his services was given in the House of Commons in answer to a question by William Duff (Liberal, Lunenburg).

Manitoba Increases Butter Output About 15 per cent more butter was produced in Manitoba in 1923 than in the preceding year, according to an estimate of the provincial dairy commissioner. The quality, he states, is also distinctly ahead of last year.

The wolf is the most dangerous wild animal in the United States and Canada.

## Buy Your Tickets Locally

When making a trip to some  
distant point, you should buy  
your railway ticket at the station  
here. When you go to the city  
to buy your ticket, you are out  
your fare and expenses and pay  
the same rate as you would here.  
Buy here, save this extra cost-  
and increase Chinook's Business.  
If you contemplate a trip to the  
Old Country, or if you purpose  
bringing friends from the Old  
Country, all arrangements can be  
made with the local Canadian  
National Station Agent, who re-  
presents all steamship companies.

small pigs. Walter Ure, Youngs-  
town. Phone 55.

## Local Items

James Ray was in Youngstown,  
last week looking after the barber  
shop for Mr. Johnson who had  
gone to Hanna to see his son  
after the latter's operation.

Chas. Neff was a visitor in Cal-  
gary over the week-end.

Dr. Daley, well known veteri-  
nary, is at present very sick. While  
visiting in Saskatoon he was taken  
ill and was a patient in the hospi-  
tal there for a time. Since return-  
ing home, he has again been very  
ill.

Robert Smith was a visitor in  
Edmonton over the week-end.

Mr. Art. Robinson north of  
town, has put in quite a good  
acreage to wheat this year having  
in around 800 acres. In addition  
to his own farm, he has seeded the  
Alva Merdoch farm and that re-  
cently vacated by H. McIntyre.

Saturday last Miss Whiteside,  
one of our local teachers, was  
taken to Cerebral hospital suffering  
from an attack of the flu. It is  
hoped that she will soon be round  
again.

The golf tournament at Cerebral  
on the King's birthday attracted  
many of our local golf fans.

A directors' meeting of the  
Chinook Agricultural Society will  
be held on Saturday evening next  
at 8.30.

We often hear of and see home-  
sick people, and for that home-  
sickness there is a cure. Some-  
times we see hearts growing weary  
apparently without a cause. It is  
homesickness of the soul and for  
that too, there is a cure. If your  
soul is homesick, come to Church  
next Sunday and find relief.

Mrs. J. T. Kerr won first prize,  
a dozen silver spoons, in the sec-  
ond flight in the ladies competi-  
tion at the Cerebral Golf Tourna-  
ment. L. S. Dawson tied for sec-  
ond place in one flight of the  
Tournament.

Mrs. W. Lee was hostess to the  
ladies card club Friday evening.  
Mrs. E. E. Jacques won the first  
prize a pair of silk hose, while  
Mrs. Kerr won the consolation.  
Mrs. W. Hurley will entertain the  
card club to-night.

LOST—Child's Sweater. Find-  
er please return to Mrs. R. Van-  
hook.

Mr. Holeton, of the School of  
Agriculture, Olds, is visiting some  
of the country schools to interest  
the pupils in school fairs.

J. Vennard made a good show-  
ing this spring when he seeded  
220 acres to wheat, double disked  
20 acres and plowed 20 acres and  
sowed it to oats. He also sum-  
merfallowed 40 acres.
